centralized and company-wide, communication, collaboration, process management, and knowledge sharing.

information sharing, process management, and modern company-wide collaboration.

Optimum brings Beezy innovative Digital Workspace solution to redefine employee work collaboration

A Civil Engineering firm engaged Optimum to design and implement a SharePoint-based, intelligent Digital Workspace (Intranet) to bring modern collaboration, communication, knowledge management, and process automation to the company. This solution also consolidates information and tasks from various systems (HR, Project Management, etc.) and surface them through employees' newsfeed, where they are already collaborating, dramatically accelerating the speed, productivity, and quality of work.

To fully meet the client's business goals and requirements, Optimum selected [Beezy](#), an intelligent workplace for Microsoft Office 365 and SharePoint, extending and improving the feature set for on-premises, cloud, and hybrid deployments.

Utilizing the Beezy platform, Optimum's team delivered an enterprise-class Intranet solution that improved user adoption and engagement in Office 365, enhanced the knowledge capture and content findability, and integrated with the full Microsoft productivity suite, including Skype, Delve, Dynamics, Outlook, and more.

About Optimum

Optimum is a modern Software Solutions and Services firm, transforming businesses through the power of People, Technology, and Automated Processes.

By utilizing our expertise and experience in strategic planning, process optimization, and innovative technologies, our clients gain clarity and productivity, reduce operational and labor costs, ensure compliance, and enable business automation and transformation.

Optimum offers a full suite of software services and solutions, including Custom Software Design and Development, Business Advisory Services, Business Process Automation, Systems Integration, Business Intelligence and Analytics, Work Management and Collaboration Solutions, IT Project Management and Business Analysis, and Staff Augmentation.
